Kindly follow these instructions to help you navigate the project effectively. Thank you!

KPI Automation
- To run the KPI Automation process,
- First, go to the KPI Automation worksheet.
- Run the **KPICalc** script. When you do this, the KPI cards in the dashboard will be dynamically updated with the automated value calculations.
- Check the dashboard to see results

Conditional Formatting
- Go to Delivery Data worksheet
- Run the **ConditionalFormatting** script to see results.

Ad-hoc Report
- First, go to the Ad-hoc report sheet.
- To generate the ad-hoc report, run the **FinalAd-hoc** script to see the results
